

Skidmore Builders understands the high standards required performing construction work in a telecom building environment. I've been fortunate enough to do several projects with Skidmore Builders. The experience has been great and I've always been pleased with the end result. I've worked with almost everybody at Skidmore Builders, including Jeff Skidmore. I found all the people to be extremely professional, responsive, competent, highly trained and qualified. The quality of their work is outstanding. We have worked together on so many projects that when challenges arise, solutions just seem to come together. These guys are good. They run a tight ship, holding their own crews and subcontractors to a high standard. Their professionalism is part of their culture.

I highly recommend Skidmore Builders if you want the job done right!

Sincerely,

Rusty Gray Retired Facility Manager BellSouth
